

GALILEO: WATCHER OF THE SKIES

Galileo (1564–1642) is one of the most important and controversial figures in the history of science. A hero of modern science and key to its birth, he was also a deeply divided man: a scholar committed to the establishment of scientific truth yet forced to concede the importance of faith, and a brilliant analyst of the elegantly mathematical...

Peek Inside the Book

he thought that human beings are, by and large, rather nasty. They can rarely be bothered to help one another, he noted, but are quick to seize any opportunity to...

Reader's Opinions

publishers Weekly Review

The first part of this book is a straight forward history of Galileo's life and work which is the best biography that I have read of the man who invented modern science. I give this part of the book 4 stars. Then the last portion of the book gets into the author's assertion that Galileo did not believe in God, without any real evidence....
